

Platinum 6000™ Digital Device

Safe

Precise

Efficient

Powerful

No Vibration

Patented Needles

Minimize Touch-Ups

Reduced Procedure Time

Approved For Insurance

Complies With Sterilization Guidelines

MicroTech Digital Power Source™

Developed with the new Microchip Digital Technology, this computerized power unit launches the new age of Micropigmentation equipment.

MEI-CHA® Digital Technology automatically regulates the power input and output to guarantee optimum performance of the Platinum and Sapphire machine. Provides sufficient power for high torque equipment ensuring precise, efficient pigment implantation resulting in less skin trauma, minimal touch-ups and a more beautiful procedure. Simplifies Brows, Liners and full Lips while providing the power for paramedical and body art tattooing procedures.

The Platinum 6000 and MicroTech Power Source™ will guarantee precise, consistent pigment implantation, minimize skin trauma, maximize client and technician safety and comfort. Efficiency, results, safety and satisfied clients; the MicroTech Power Source/Platinum 6000 is your most worthwhile business investment.

Great Versatility With Hand or Foot Pedal Control

Digital Display Indicates Speed For Precise Control

Digital Display Indicates Needle Rotations Per Second

Easy Access Power Control Dial

Use With Sapphire Pro or Platinum 6000

Transforms The Sapphire Pro into a More Powerful Machine

Device Holder (disposable)

For Platinum 6000

Foot Pedal Control For Sapphire Pro or Platinum 6000 or any MEI-CHA® Machine

Speeds

- PLATINUM DEVICE w/MicroTech Power Source: 0-14700 rpm, 0-245 rps
- SAPPHIRE DEVICE w/MicroTech Power Source: 0-9700 rpm, 0-158 rps
- SAPPHIRE DEVICE w/wall adaptor: 0-3000 rpm, 0-50 rps

Platinum 6000™ Device

Health and Safety—Use only sterile, disposable parts to protect the health and safety of technician and client.

Prevent Contamination—Tri-level back flow barrier eliminates back flow of pigment and bodily fluids.

Strong Torque—New, innovative machine design provides exceptional torque for efficient and precise pigment implantation. Beautiful results with minimal skin trauma.

Disposable Machine Tip with Special Feature—Special feature, tip vent minimizes pigment splatter and increases tip retention volume. Save time with a faster, cleaner procedure.

No Vibration—Needle stabilization provided by unique Retainer and Mid-Section design. Another feature that enhances precision resulting in an easier, more comfortable procedure.

Needle Depth Regulator Ensures Consistency At Any Speed—MicroTech Power Source controls needle depth maintaining a constant depth of pigment implantation creating very even color results and this minimizing touch-ups.

Outstanding Workmanship—Lightweight design for comfort and ease in handling. Perfect for a full day of procedures.

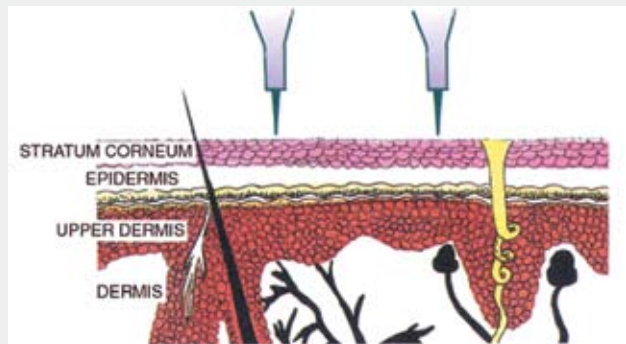

Range Of Speed—Wide range of speed adjustments suitable for all procedures, all types of skin, and all situations.

Hand & Foot Pedal Power Control—Choose your preference of hand and foot pedal power control.

Extra-Long Patented “3E” Combo Needles—Patented safety feature needles exclusively by Mei-Cha, available in 1, 2(flat), 3(round), 5(round), 6(flat), 7(round), 8(flat) and 11(round).

With MicroTech Digital Power Source

Every stroke is equally powerful and deposits pigment evenly into the skin

- Digital microchip regulates input/output speed (power) providing Sphire and Platinum machine with strong torque with every stroke
- Consistent needle depth at any speed
- Deposits pigment evenly into the skin
- Quicker, safer and more beautiful pigmentation procedure

Platinum 6000™

Equipped with worldwide patented “3E” combo needle

PATENT NO. 5,472,449

PATENT NO. 5,586,473

PATENT NO. 5,776,158

Detachable, disposable, sterile combo coupler, spring and retainer complies with government sterilization guidelines.

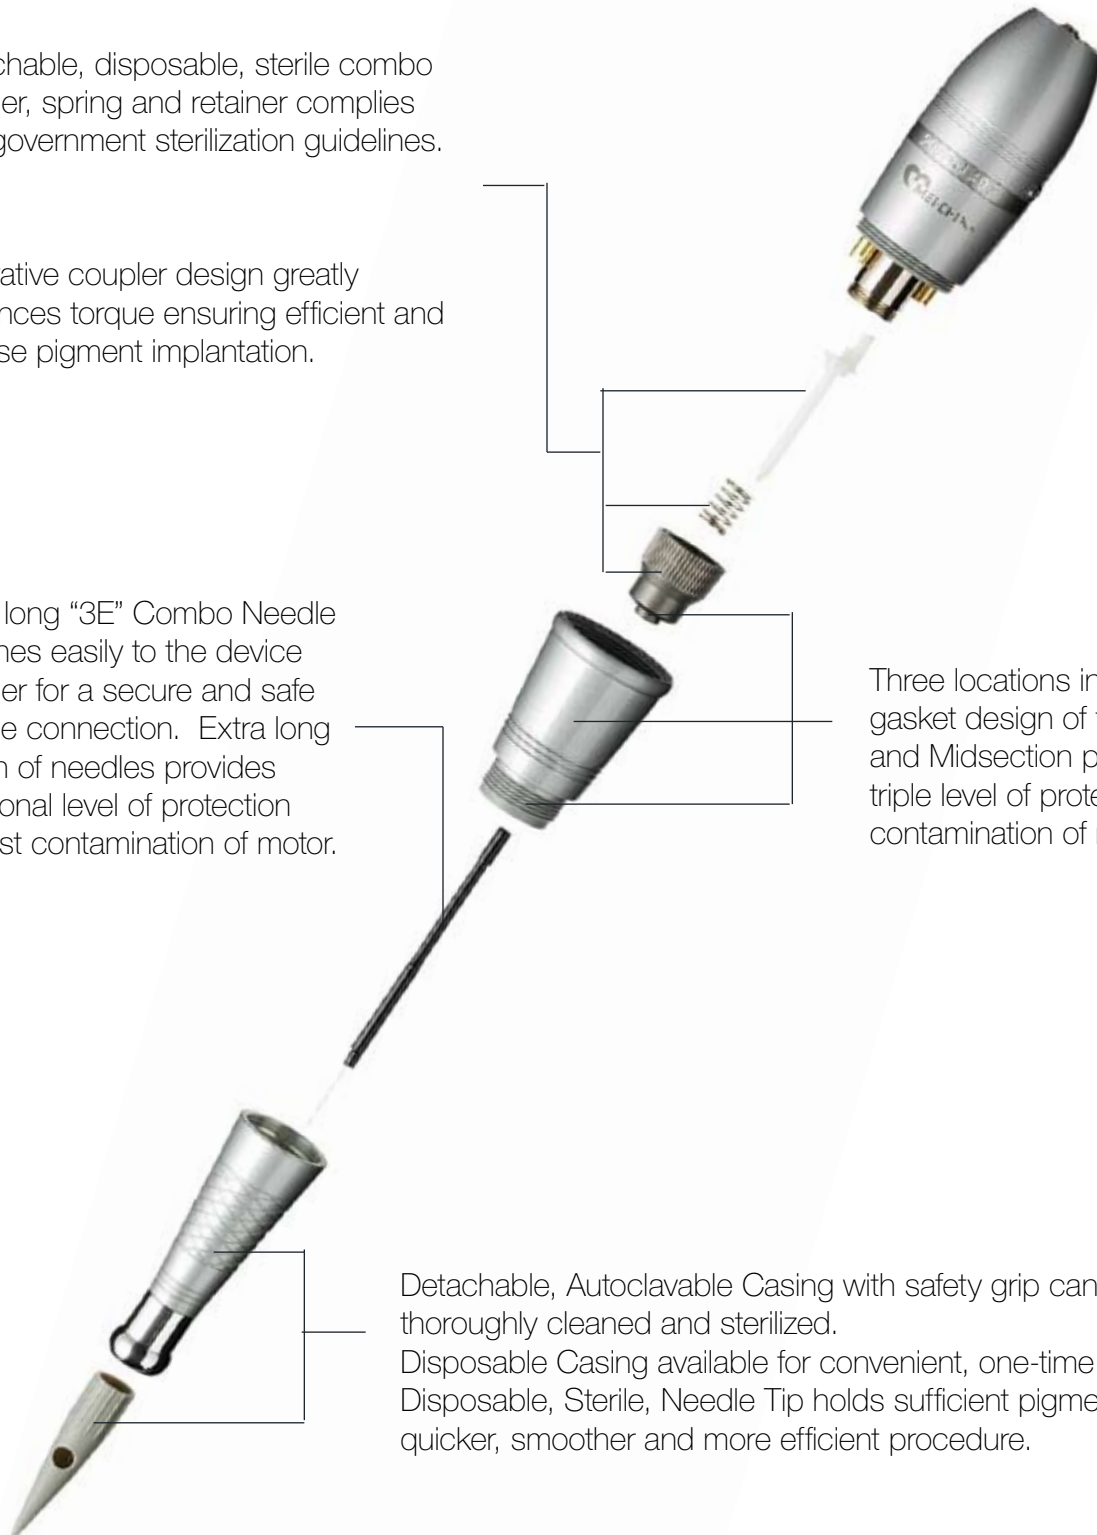

Innovative coupler design greatly enhances torque ensuring efficient and precise pigment implantation.

Extra long “3E” Combo Needle attaches easily to the device coupler for a secure and safe needle connection. Extra long length of needles provides additional level of protection against contamination of motor.

Three locations in the unique gasket design of the Retainer and Midsection provide a triple level of protection against contamination of motor.

Detachable, Autoclavable Casing with safety grip can be thoroughly cleaned and sterilized.

Disposable Casing available for convenient, one-time usage. Disposable, Sterile, Needle Tip holds sufficient pigment for a quicker, smoother and more efficient procedure.

Platinum 6000™ MicroTech Deluxe Kit

Deluxe Kit Includes:

- (1) Platinum 6000 Device
- (1) MicroTech Power Source, 120 V or 230V
- (1) Disposable Device Holder
- (1) Foot Pedal Control
- (1) AC Power Cord
- (1) Instruction Manual
- (2) Two Prong Power Cord
- (2) Disposable Casing
- (2) Disposable Midsection
- (2) Coupler
- (2) Retainer
- (2) Spring
- (5) Extra Long "3"E Single Prong Needles
- (5) Disposable Machine Tips

Platinum 6000™ Needles & Coupler

EXTRA LONG “3E” NEEDLES FOR PLATINUM 6000 DEVICE *Worldwide Patent, Superior Quality Comply with* *Health Department Requirements*

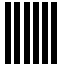

- Disposable
- Sterilized
- Individually packaged
- Manufactured of High Quality, stainless steel
- Color coded plastic sleeve for easier needle size identification
- Each needle is packaged with plastic needle guard tube for needle point protection
- Needles available in single, double (flat), triple (round), five (round), six (flat), seven (round), eight (flat) and eleven (round)

 **1** Prong   MC-5201 Platinum Combo Single Prong Needle
Color coded package: Red. Use with Platinum 6000 device,
Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

 **2** Prong Flat   MC-5201 Platinum Combo Single Prong Needle
Color coded package: Purple. Use with Platinum 6000 device,
Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

 **3** Prong Round   MC-5201 Platinum Combo Single Prong Needle
Color coded package: Green. Use with Platinum 6000 device,
Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

 **5** Prong Round   MC-5201 Platinum Combo Single Prong Needle
Color coded package: Blue. Use with Platinum 6000 device,
Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

 **6** Prong Flat   MC-5201 Platinum Combo Single Prong Needle
Color coded package: Gray. Use with Platinum 6000 device,
Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

 **7** Prong Round   MC-5201 Platinum Combo Single Prong Needle
Color coded package: Red. Use with Platinum 6000 device,
Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

 **8** Prong Flat   MC-5201 Platinum Combo Single Prong Needle
Color coded package: Brown. Use with Platinum 6000 device,
Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

 **11** Prong Round   MC-5201 Platinum Combo Single Prong Needle
Color coded package: Red. Use with Platinum 6000 device,
Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

Machine Tips & Attachments

Disposable tip vent minimizes pigment splatter and increases tip retention volume. Save time with a faster, cleaner procedure!

MC-5013-S Platinum 6000 Machine Tip, Small

Use with Platinum extra long "3E" Combo needles: For single, double (flat) & triple (round). Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

MC-5013-F Platinum 6000 Machine Tip, Flat

Use with Platinum extra long "3E" Combo needles: For six (flat) & eight (flat). Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

MC-5013-L Platinum 6000 Machine Tip, Large

Use with Platinum extra long "3E" Combo needles: For seven (round) & eleven (round). Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

MC-5017 Platinum 6000 Midsection

Disposable midsection stabilizes needle enhancing pigment implant precision and preventing contamination. Midsection must be replaced with every procedure to ensure smooth needle movement and efficient workmanship of device.

Available in 10 pcs/pkg or 50 pcs/box.

MC-5018 Platinum 6000 Coupler

Use with Platinum 6000 device to attach "3E" Combo needle. Coupler must be replaced with every procedure to ensure smooth needle movement and efficient workmanship of device. Individually packaged. Available in 10 pcs/pkg or 50 pcs/box.

MC-5019 Platinum 6000 Retainer

Disposable retainer stabilizes needle and prevents contamination. Retainer must be replaced with every procedure to ensure smooth needle movement and efficient workmanship of device. Available in 10 pcs/pkg or 50 pcs/box.

MC-5020 Platinum 6000 Spring

Disposable spring must be replaced with every procedure to ensure smooth needle movement and efficient workmanship of device. Available in 10 pcs/pkg or 50 pcs/box.

MC-5550-1 Disposable Device Holder for the MicroTech Power Source

Individually packaged, sterilized and disposable. Available in 10 pcs/pkg or 50 pcs/box.

MC-5550-2 Foot Pedal Control for the MicroTech Power Source

Sold individually.

MC-5550-3 Power cord for the MicroTech Power Source

Sold individually.

MC-5550-4 Two-Prong Power Cord for the MicroTech Power Source

Sold individually.

MC-5014-A Platinum 6000 Casing (Autoclavable)

The casing can be separated into two sections for easier, more effective cleaning. May be sterilized via steam autoclave or cold liquid method. Sold individually.

MC-5014-P Platinum 6000 Disposable Casing (Plastic)

Disposable plastic casing eliminates time expenditure on sterilization. Available in 10 pcs/pkg or 50 pcs/box.
